Fra i molteplici obiettivi della serie di monografie dedicata alla soluzione economica di moltissimi piccoli e grandi problemi pratici che possono rendere più vivibile e confortevole un appartamento, il tema che viene sviscerato in profondità sotto tutti gli aspetti nelle quasi 1200 pagine di testo in quadricromia parte da un preciso interrogativo: con quali caratteristiche si può tentare di realizzare o ristrutturare un'abitazione in modo che sia comodamente fruibile per tutte le età, su tutto l'arco della vita, da quando si è appena nati fino alla vecchiaia più avanzata?

Fra i molteplici obiettivi della serie di monografie dedicata alla soluzione economica di moltissimi piccoli e grandi problemi pratici che possono rendere più vivibile e confortevole un appartamento, il tema che viene sviscerato in profondità sotto tutti gli aspetti nelle quasi 1200 pagine di testo in quadricromia parte da un preciso interrogativo: con quali caratteristiche si può tentare di realizzare o ristrutturare un'abitazione in modo che sia comodamente fruibile per tutte le età, su tutto l'arco della vita, da quando si è appena nati fino alla vecchiaia più avanzata? L'esame dei numerosi spazi esterni che possono essere presenti in una proprietà abitativa ha lo scopo di identificare e descrivere quali sono le prerogative che ciascuno deve possedere per poter rispondere adeguatamente in termini di accessibilità e usabilità. L'obiettivo è ancora e sempre quello di fornire suggerimenti sia nel caso in cui si debbano realizzare sia soprattutto quando si devono modificare per renderli fruibili. I singoli capitoli si sviluppano con un percorso logico, che ha inizio con l'accesso alla proprietà, che moto sovente è il primo a costituire una barriera architettonica, con scalini o dislivelli, cancelli o portoni insuperabili con molto difficoltà stando in carrozzina. Le soluzioni escogitate per facilitare l'usabilità sono numerose e sono esaminate in ciascun caso. Ad esempio, è possibile creare con poca spesa un piccolo orto o un giardino terapeutico che risulti gestibile anche da parte di chi ha problemi alla colonna vertebrale o è costretto in carrozzina. Le stesse caratteristiche di accessibilità si possono conferire organizzando i piccoli laboratori domestici necessari per poter svolgere attività artistiche varie (produzione di oggettistica, ceramiche, sculture) o per effettuare le piccole riparazioni casalinghe.

Questa pubblicazione si prefigge lo scopo di affiancare sia il manutentore di professione sia chi vuole occuparsi in prima persona della conduzione della propria piscina. Gli argomenti sono trattati sia in modo semplice che approfondito, con l'intento di fornire informazioni utili qualunque sia il livello di conoscenza del lettore.

Surveillance for waterborne disease and outbreaks associated with drinking water and water not intended for drinking-- United States, 2005-2006: "Problem/Condition: Since 1971, CDC, the U.S. Environmental Protection Agency (EPA), and the Council of State and Territorial Epidemiologists have maintained a collaborative Waterborne Disease and Outbreak Surveillance System (WBDOSS) for collecting and reporting data related to occurrences and causes of waterborne-disease outbreaks (WBDOs) and cases of waterborne disease. This surveillance system is the primary source of data concerning the scope and effects of waterborne disease in the United States. Reporting Period: Data presented summarize 28 WBDOs that occurred during January 2005-December 2006 and four previously unreported WBDOs that occurred during 1979-2002. Description of System: The surveillance system includes data on WBDOs associated with recreational water, drinking water, water not intended for drinking (WNID) (excluding recreational water), and water use of unknown intent. Public health departments in the states, territories, localities, and Freely Associated States (FAS) (i.e., the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau, formerly parts of the U.S.-administered Trust Territory of the Pacific Islands) are primarily responsible for detecting and investigating WBDOs and voluntarily reporting them to CDC by a standard form. Only cases and outbreaks associated with drinking water, WNID (excluding recreational water), and water of unknown intent (WUI) are summarized in this report. Cases and outbreaks associated with recreational water are reported in a separate Surveillance Summary."--Page 39.

Water is the major natural reservoir for legionellae, and the bacteria are found worldwide in many different natural and artificial aquatic environments, such as cooling towers, water systems in hotels homes, ships and factories, respiratory therapy equipment, fountains misting devices and spa pools. This book provides a comprehensive overview on the sources, ecology and laboratory diagnosis of legionella. Guidance is provided on risk assessment and risk management of susceptible environments. The necessary measures to prevent, or adequately control, the risk from exposure to legionella bacteria are identified for each identified environment. Outbreaks of legionellosis generally cause a high level of morbidity and mortality in the people affected and as such the suspicion of an outbreak warrants immediate action. The policies and practice for outbreak management and the institutional roles and responsibilities of an outbreak control team are reviewed. This book will be useful to all those concerned with legionella and health, including environmental and public health officers, health care workers, the travel industry, researchers and special interest groups.

THE RECORD-BREAKING, #1 NEW YORK TIMES BESTSELLER – OVER 35 MILLION COPIES SOLD The first book by Wayne Dyer, author of the multimillion-copy bestseller Pulling Your Own Strings and national bestsellers There's a Spiritual Solution to Every Problem and Wisdom of the Ages, a positive and practical guide to breaking free from the trap of negative thinking and enjoying life to the fullest. If you're plagued by guilt or worry and find yourself unwittingly falling into the same old self-destructive patterns, then you have "erroneous zones" – whole facets of your approach to life that act as barriers to your success and happiness. Perhaps you believe that you have no control over your feelings and reactions – Dyer shows how you can take charge of yourself and manage how much you will let difficult times and people affect you. Or maybe you spend more time worrying what others think than working on what you want and need – Dyer points the way to true self-reliance. From self-image problems to over-dependence on others, Dyer gives you the tools you need to break free from negative thinking and enjoy life to the fullest.

This report is part of WHO's response to the 49th World Health Assembly held in 1996 which adopted a resolution declaring violence a major and growing public health problem across the world. It is aimed largely at researchers and practitioners including health care workers, social workers, educators and law enforcement officials.
