This book is essential while preparing for the theory examination of orthopaedics. The book has been presented in such a manner that important and difficult past questions have been written in simpler and reproducible format. Authenticity of the answers has been maintained by giving as many references as possible. The book also gives long case sheet format that gives a scheme about how to write the long cases. Numerous diagrams and profuse illustrations further enhance the quality of the book. An absolute must for orthopaedic residents appearing for exams.

This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.
