Reviewed as an excellent book for understanding the advanced technology applied to reportedly 300,000 or more victims of human experimentation within the USA and millions globally, "Targeted" for every reason under the Sun. In Book Two of the "Mind Control Technology" book series, the author details personal experiences surrounding abuse and victimization by military and law enforcement, et. al., using real-time surveillance, drones, and highly advanced, patented, influence technology on her covertly hoping to substantiate allegations. When the manipulative effort failed, resulting in this explosive tell-all book, the physical and psychological effort escalated as attempts to prevent publication and the author's living Hell around the clock by non-ionizing radiation beamed both inside and outside her home and 24/7 tracking around the clock. It appears that those involved in covert technology testing and spearheading "The Program" was attempting to make good on the promise, by repeated threats, that if she did not stop publication she would suffer the consequences. And, the consequences could be deployed with ease from one of the approximately 120 state-of-the-art fusion centers across our country today, unseen or detectable to the human eye, or as close as official set-ups at neighboring locations. Little known today, various advanced, highly perfected technologies are being used globally such as patented Synthetic Telepathy also known as the "Hearing Voices" effect, mind-reading, consciousness-altering, dream manipulation, etc., along with the capability of subliminal message carrying through communication towers, portable systems, and devices, and satellites and drones. The technological arsenal of today consists of technology that can

manipulate thoughts, create visual holograms, or even stimulate a person sexually, electromagnetically, a new form of covert, legalized, terrorism, miles away through a supercomputer terminal. It appears that Big Brother's 1984 technocratic agenda has come of age by handheld, portable, land, sea, and space-based technologies and the weapon system first publicized during the Reagan era of the '80s as the Strategic Defense Initiative then fondly called "Star Wars" as an exemplified platform using a wide array of advanced weapon concepts, including lasers, particle beams. Pittman's truthful revelations and honesty placed her in a unique position, which so many fear because of ongoing unawareness of covert set-ups prior to the targeting. By revealing tactics that start human experimentation, then pointing the finger you can become expendable.
