Do you have rushes of fear accompanied by a pounding heart, trembling, dizziness, and feelings of unreality that make you think you're sick, dying, or losing your mind? Do these feelings interfere with your normal daily routine, or prevent you from doing things you would normally do? If you are prone to panic attacks and constantly worry about when the next attack may come, you may suffer from panic disorder and/or agoraphobia. Though panic disorder seems irrational and uncontrollable, it has been proven that a treatment like the one outlined in this book can help you take control of your life. Now in its 4th edition, *Mastery of Your Anxiety and Panic, Workbook* has been updated to include strategies and techniques for dealing with both panic disorder and agoraphobia. The program outlined is based on the principles of cognitive-behavioral therapy (CBT) and is organized by skill, with each chapter building on the one before it. You will learn the importance of record-keeping and monitoring your progress, as well as

breathing techniques and thinking skills. The main focus of treatment involves learning how to face agoraphobic situations and the scary physical symptoms of panic from an entirely new perspective. Self-assessment quizzes, homework exercises, and interactive forms allow you to become an active participant in your treatment. Over time, you will learn to manage your panic attacks, anxiety about panic, and avoidance of panic and agoraphobic situations. This workbook is a one-of-a-kind resource that has been recommended for use by public health services around the world. It allows you to work alongside your therapist to personalize your treatment strategy and learn recovery skills that are useful for a lifetime.

This volume has been written by the editors of *Fundamentals of Anaesthesia: 2nd Edition* and *The Clinical Anaesthesia Viva Book*, two best-selling GMM titles for trainee anaesthetists. As well as the usual QBase features that allow candidates to practice, mark, resit and infinitely customise MCQ examinations using the free QBase CD-ROM, this volume has the added value of being cross-referenced throughout to '*Fundamentals of Anaesthesia: 2nd Edition*'.

Truth is one of the most debated topics in philosophy; Wolfgang Künne presents a comprehensive critical examination of all major theories. Conceptions of Truth is organized around a flow-chart comprising sixteen key questions, ranging from 'Is truth a property?' to 'Is truth epistemically constrained?' Künne expounds and engages with the ideas of many thinkers, from Aristotle and the Stoics, to Continental analytic philosophers like Bolzano, Brentano, and Kotarbinski, to such leading figures in current debates as Dummett, Putnam, Wright, and Horwich. He explains many important distinctions (between varieties of correspondence, for example, between different conceptions of making true, between various kinds of

eternalism and temporalism) which have so far been neglected in the literature. Künne argues that it is possible to give a satisfactory 'modest' account of truth without invoking problematic notions like correspondence, fact, or meaning. And he offers a novel argument to support the realist claim that truth outruns justifiability. The clarity of exposition and the wealth of examples will make *Conceptions of Truth* an invaluable and stimulating guide for advanced students and scholars in metaphysics, epistemology and the philosophy of language.

Like the previous versions, the fifth edition of *An Introduction to Research in the Health Sciences* has two overall aims. 1) To introduce the fundamental principles of research methodology and explain how these principles are applied for conducting research in the health sciences. 2) To demonstrate how evidence produced through research is applied to solving problems in everyday health care. This book is written in an accessible style. It maintains the traditions of the previous editions, with examples, questions, feedback sections, and an extensive glossary. Uses simple language and demystifies the jargon Provides built-in feedback for readers to assess their own progress Gives examples relating directly to the health sciences Provides an extensive glossary for better understanding of the language of research Addresses qualitative as well as quantitative research issues Includes a chapter focussing on the use of qualitative methods in health research Includes a chapter for discussing systematic reviews and meta-analyses Contains more revision questions Increased emphasis throughout on evidence based concepts
