This volume bridges the gap across these two important socialization contexts and provides insights into the processes that account for the links across the systems – the ways in which the relationships between these systems shift across development. In addition, the variations in the links between family and peers are illustrated by cross-cultural work, studies of abused children, and research on the impact of maternal depression. In short, the volume provides not only a convenient overview of recent progress at the time but lays out an agenda for future research.
