The definitive international history of one of the world's most successful rally cars. Covers every Lancer model - including all special editions, and Dodge, Colt, Plymouth, Valiant, Eagle, Proton and Hyundai variants - from 1973 to date. Includes a Foreword by Shinichi Kurihara, Mitsubishi's Evo team leader.

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The 1-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

In Public Enemies, bestselling author Bryan Burrough strips away the thick layer of myths put out by J. Edgar Hoover's FBI to tell the full story—for the first time—of the most spectacular crime wave in American history, the two-year battle between the young Hoover and the assortment of criminals who became national icons: John Dillinger, Machine Gun Kelly, Bonnie and Clyde, Baby Face Nelson, Pretty Boy Floyd, and the Barkers. In an epic feat of storytelling and drawing on a remarkable amount of newly available material on all the major figures involved, Burrough reveals a web of interconnections within the vast American underworld and demonstrates how Hoover's G-men overcame their early fumbles to secure the FBI's rise to power.

If you have questions about the fundamentals in our faith, then this series is for you. "Foundations" examines eight essential elements which define the Christian value system. The following questions are answered and more:What does it mean to be "saved"?Where did we get the Bible/How is the Bible relevant?What is the significance of "baptism"?What about the baptism in the Holy Spirit?Does God care about small aspects of my life?What is conviction?How does God expect me to handle my money?What is God's dream for my life?How do I fit into the church? Our hope is to answer all these questions in a unique and relevant manner that will change your life

Haykin examines both the mathematical theory behind various linear adaptive filters with finite-duration impulse response (FIR) and the elements of supervised neural networks. This edition has been updated and refined to keep current with the field and develop concepts in as unified and accessible a manner as possible. It: introduces a completely new chapter on Frequency-Domain Adaptive Filters; adds a chapter on Tracking Time-Varying Systems; adds two chapters on Neural Networks; enhances material on RLS algorithms; strengthens linkages to Kalman filter theory to gain a more unified treatment of the standard, square-root and order-recursive forms; and includes new computer experiments using MATLAB software that illustrate the underlying theory and applications of the LMS and RLS algorithms.
