Richardson also said the public and legal community will benefit because "the exchange of ideas between the panel and dissent will remain available as a persuasive source." The federal ...

Alcohol is a killer--1 of every 13 deaths in the United States is alcohol-related. In addition, 5 percent of the population consumes 50 percent of the alcohol. The authors take a close look at the problem in a "classy little study," as The Washington Post called this book. The Library Journal states, ". . . [T]his is one book that addresses solutions. . . . And it's enjoyably readable. . . . This is an excellent review for anyone in the alcoholism prevention business, and good background reading for the interested layperson." The Washington Post agrees: the book ". . . likely will wind up on the bookshelves of counselors, politicians, judges, medical professionals, and law enforcement officials throughout the country."

"Master the GED" "2010 "is a comprehensive guide that provides the review material and test prep needed to score higher on the high school equivalency diploma test. The exercises and drills provide hands-on practice for every type of test question. Complete with in-depth reviews for each subject exam: Language Arts, Reading; Language Arts, Writing; Mathematics; Science; and Social Studies.

Provides practice exams with answers and explanations, and includes reviews of all test areas from writing skills to science.

This book is intended to familiarize readers with the theoretical basis and practical applications of the editing process. This involves the examination of the rhetorical canons- invention, arrangement, style, delivery; and the corresponding rhetorical objectives of editing - accuracy, clarity, propriety, and artistry. We envision a diverse audience for this book. For aspiring editors, we offer an introduction to rhetorical principles as a vehicle for developing a repertoire of theoretically sound and effective strategies. For professionals-directors of communications, public relations specialists, experienced writers and editors of professional and technical publications - this book will serve as a reference and guide reinforcing their intuitive understanding and appreciation of the art of editing.

This clearly written, well-illustrated text satisfies a long-standing need for an authoritative account of the methodology of cultural studies. It will become required reading on many courses' - "David Silverman, Goldsmiths College, University of London " The growth of interdisciplinary cultural studies poses new challenges for the process of doing research. In this textbook, Pertti Alasuutari introduces the range of approaches and methodological tools available for undertaking critical research, and shows how cultural studies transcend traditional divisions between qualitative and quantitative methods and between social sciences and humanities. He draws upon three main sources: the qualitative traditions of sociological and anthropological research, including ethnography and symbolic interactionism; methods for the study of language and interaction - semiotics, narrative analysis, conversation analysis and discourse analysis; and quantitative analysis in terms of its relevance to data produced by research on culture.

In recent years the social sciences and the humanities have drawn closer to each other in thought and method. This rapprochement has led to new perceptions of human behavior by

sociologists, as well as new methodological orientations. Sociologist Joseph R. Gusfield draws upon drama and fiction to show how human action is shaped by the formal dimensions of performance. Gusfield first defines the concept of behavior as artistic performance. He then analyzes routine and classic social research reports as literary performances in qualitative and quantitative terms. Next he moves to social movements and public actions, demonstrating how objects and events are products of the interpretation and reflection of individuals. He draws upon literary and artistic conventions to deal with issues of representation and meaning. In the first and last chapters, Gusfield provides a conceptual summary examining the relation between sociology as science and art, arguing that sociological methods are neither science nor art, but partake of both. Following the philosopher Paul Ricouer, Gusfield shows how human behavior can be read as a text, always telling the participant or observer "something about something." Performing Action will be of interest to sociologists, psychologists, and students of aesthetics and critical theory.

Alcohol use by young people is extremely dangerous - both to themselves and society at large. Underage alcohol use is associated with traffic fatalities, violence, unsafe sex, suicide, educational failure, and other problem behaviors that diminish the prospects of future success, as well as health risks " and the earlier teens start drinking, the greater the danger. Despite these serious concerns, the media continues to make drinking look attractive to youth, and it remains possible and even easy for teenagers to get access to alcohol. Why is this dangerous behavior so pervasive? What can be done to prevent it? What will work and who is responsible for making sure it happens? Reducing Underage Drinking addresses these questions and proposes a new way to combat underage alcohol use. It explores the ways in which may different individuals and groups contribute to the problem and how they can be enlisted to prevent it. Reducing Underage Drinking will serve as both a game plan and a call to arms for anyone with an investment in youth health and safety.

The author of this book argues that drunk driving is more than just a criminal issue. He offers a practical approach to the problem of drunk driving, one that combines criminal deterrence with other efforts to reduce the number of deaths caused by drivers under the influence of alcohol.
