Q&A: BASF EFKA Additives | Where business meets science EFKA FL 3777 is a fluorocarbon-modified polymer used as a slip and leveling agent. It improves leveling, prevents cratering, helps substrate wetting acts as a defoamer and de-aeration aid, and does not interfere with intercoat adhesion.

EFKA® FL 3777 | BASF EFKA FA 4611 is a solvent-free dispersing agent (acidic polyether) which shows excellent stabilization of inorganic pigments, in particular titanium dioxide. With EFKA FA 4611 high pigment and filler loadings, strong reduction of mill-base viscosity and an improved rheological behavior can be achieved.

Creëer een flexibel winkelconcept met EFKA-frames. Om uw winkel aantrekkelijk te houden voor de klant is een dynamische inrichting een vereiste. Promotiecampagnes, wisselende thema ' s en een constant wijzigend aanbod maken dat de lay-out van de winkel regelmatig moet worden aangepast. Dat moet makkelijk, snel, betaalbaar en duurzaam gebeuren.

Entrepreneur and Nazi functionary Fritz Kiehn lived through almost 100 years of German history, from the Bismarck era to the late Bonn Republic. A successful manufacturer, Kiehn joined the Nazi Party in 1930 and obtained a number of influential posts after 1933, making him one of the most powerful Nazi functionaries in southern Germany. These posts allowed him ample opportunity to profit from "Aryanizations" and state contracts. After 1945, he restored his reputation, was close to Adenauer's CDU during Germany's economic miracle, and was a respected and honored citizen in Trossingen. Kiehn's biography provides a key to understanding the political upheavals of the twentieth century, especially the workings of the corrupt Nazi system as well as the "coming to terms" with National Socialism in the Federal Republic.

This annual publication provides details of taxes paid on wages in OECD countries. Taxing Wages 2021 includes a special feature entitled: "Impact of COVID-19 on the Tax Wedge in OECD Countries".

Databook of Antiblocking, Release, and Slip Additives. Second Edition contains detailed information on over 300 important additives for polymers, including additives that are used to minimize adhesion, aid separation, and enhance processing and end-applications for polymers. Each additive is presented with data in the following categories: General Information, Physical Properties, Health and Safety, Ecological Properties, and Use and Performance. Data fields covered include state, odor, color, autoignition temperature, probability of biodegradation, and much more. Recommendations are given for specific products, processing methods, and mold materials, and an assessment is given for each additive 's features and benefits. Contains the most extensive data available on a large number of antiblocking, release and slip additives for polymers Features 130 data fields for each additive that are divided into General Information, Physical Properties, Health and Safety, Ecological Properties, and Use and Performance Includes an assessment of the benefits and properties of each additive, recommended dosages and processing methods

In this short, compelling memoir that will appeal to both general readers and fellow scientists, Harry S. Katz offers recollections and lessons learned from more than eight decades of life. In evocative snapshots, he describes early struggles to overcome a severe speech problem; lifelong attempts to develop technical expertise and creativity in his specialty area of materials science; his Army service during World War II; and six decades of marriage with his Holocaust-survivor wife, Toby, who at one point served three four-year terms on their local town council. From the perspective of someone who started two small businesses in different plastics-related fields, Katz discusses a few of the most memorable projects that he worked on, and provides suggestions for making the future use of plastics safer and healthier for human health and the environment. Katz, who is a checkers and chess expert, also discusses why he believes these kinds of challenging and creative activities are crucial for keeping a persons mind sharp.

Databook of Surface Modification Additives contains data on 7 groups of additives, including anti-scratch and mar-preventing additives, gloss enhancement and surface matting additives, additives for formation of tack-free surface and tackifiers, and stain inhibiting additives. The information on each adhesion promoter is divided into five sections, including General Information, Physical Properties, Health and Safety, Ecological Properties and Use and Performance. This databook will be an extremely useful source of data for engineers, researchers and technicians interested in using additives to modify and improve the surface properties of materials. Provides detailed, up-to-date, essential data on 7 groups of additives Covers general information, physical-chemical properties, health and safety, ecological properties and use and performance Includes recommendations for specific products, applications, processing methods and the concentration used
