A startling new vision of paranormal romance: When a human ventures into the world of vampires—a decadent milieu of blood-bonds and betrayal—she discovers that not all is what it seems. For Reyna Carpenter, giving up her body isn't a choice. It's survival. In a civilization laid waste by poverty and desperation, Reyna accepts a high-paying position with the wealthy and hungry vampire elite. Her new job is as the live-in blood escort for the intimidating, demanding, and devilishly handsome Beckham Anderson. He's everything she expected from a vampire, except for one thing—he won't feed off her. Reyna soon discovers that behind Beckham's brooding, wicked façade lies a unique and complex man. And that, in a dark and divided world, she is more valuable than she ever would have believed. For with each passing night, Reyna can't shake the sensation that it's Beckham who's afraid of her. Note: Reyna and Beckham's story continues in Blood Match. This ebook includes an excerpt from another Loveswept title.

The visionary author's masterpiece pulls us—along with her Black female hero—through time to face the horrors of slavery and explore the impacts of racism, sexism, and white supremacy then and now. Dana, a modern black woman, is celebrating her twenty-sixth birthday with her new husband when she is snatched abruptly from her home in California and transported to the antebellum South. Rufus, the white son of a plantation owner, is drowning, and Dana has been summoned to save him. Dana is drawn back repeatedly through time to the slave quarters, and each time the stay grows longer, more arduous, and more dangerous until it is uncertain whether or not Dana's life will end, long before it has a chance to begin.

From neorealism's resolve to Berlusconi revisionist melodramas, this book examines cinema's role in constructing memories of Fascist Italy. Italian cinema has both reflected and shaped popular perceptions of Fascism, reinforcing or challenging stereotypes, remembering selectively and silently forgetting the most shameful pages of Italy's history.

This Palgrave Handbook offers the first international comparative study into the efficiency of the industrial organization of the global wine industry. Looking at several important vineyards of the main wine countries, the contributors analyze differences in implementation and articulation of three key stages: grape production, wine making and distribution (marketing, selling and logistics). By examining regulations, organization theory, industry organizational efficiency and vertical integration, up to date strategies in the sector are presented and appraised. Which models are most efficient? What are the most relevant factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and professionals in the wine industry.

Astrocytes can be defined as the glia inhabiting the nervous system with the main function in the maintenance of nervous tissue homeostasis. Classified into several types according to their morphological appearance, many of astrocytes form a reticular structure known as astroglial syncytium, owing to their coupling via intercellular channels organized into gap junctions. Not only do astrocytes establish such homocellular contacts, but they also engage in intimate heterocellular interactions with neurons, most notably at synaptic sites. As

synaptic structures house the very core of information transfer and processing in the nervous system, astroglial perisynaptic positioning assures that these glial cells can nourish neurons and establish bidirectional communication with them, functions outlined in the concepts of the astrocytic cradle and multi-partite synapse, respectively. Astrocytes possess a rich assortment of ligand receptors, ion and water channels, and ion and ligand transporters, which collectively contribute to astrocytic control of homeostasis and excitability. Astroglia control glutamate and adenosine homeostasis to exert modulatory actions affecting the real-time operation of synapses. Fluctuations of intracellular calcium can lead to the release of various chemical transmitters from astrocytes through a process termed gliotransmission. Sodium fluctuations are closely associated to those of calcium with both dynamic events interfacing signaling and metabolism. Astrocytes appear fully integrated into the brain cellular circuitry, being an indispensable part of neural networks.

In the mid-1870s, the experimental therapy of lamb blood transfusion spread like an epidemic across Europe and the USA. Doctors tried it as a cure for tuberculosis, pellagra and anemia; proposed it as a means to reanimate seemingly dead soldiers on the battlefield. It was a contested therapy because it meant crossing boundaries and challenging taboos. Was the transfusion of lamb blood into desperately sick humans really defensible? The book takes the reader on a journey into hospital wards and lunatic asylums, physiological laboratories and 19th century wars. It presents a fascinating story of medical knowledge, ambitions and concerns - a story that provides lessons for current debates on the morality of medical experimentation and care.

This cultural history of Mussolini's dictatorship discusses the meanings of modernity in interwar Italy. The work argues that fascism appealed to many Italian intellectuals as a new model of modernity that would resolve the European and national crises.

Relying on previously undisclosed confessions of former mafia members now cooperating with the police, Letizia Paoli provides a clinically accurate portrait of mafia behavior, motivations, and structure in Italy. The mafia, Paoli demonstrates, are essentially multifunctional ritual brotherhoods focused above all on retaining and consolidating their local political power base. A truly interdisciplinary work of history, politics, economics, and sociology, Mafia Brotherhoods reveals in dramatic detail the true face of one of the world's most mythologized criminal organizations.
