Da 35 anni Joe McNally crea fotografie che raccontano delle storie. Le sue immagini, di volta in volta drammatiche, sottili, energiche, gioiose, toccanti, misteriose, sono eterogenee quanto gli approcci alla loro illuminazione. In Fotografare la luce, Joe vi porta dietro le quinte per spiegare le sue soluzioni per l'illuminazione di decine di fotografie. Ciò che rende unico questo libro, però, è che verrete guidati oltre le aride cifre per scoprire come far funzionare la luce in relazione alle foto. Fotografare la luce tratta di flash grandi e piccoli, e inizia con la dimostrazione delle tecniche di illuminazione di base, dei diffusori e delle soluzioni a flash singolo, per poi passare alla disamina delle singole immagini, delle tecnologie dei flash (come la sincro ad alta velocità e i più recenti attivatori TTL via radio) e di moltissimi stili e approcci all'illuminazione. Joe mostra le foto che crea man mano che si avvicina allo scatto finale, e arricchisce il percorso con fotografie del "dietro le quinte" e schizzi che mostrano in dettaglio il posizionamento delle luci e le impostazioni di potenza, apertura e tempi di posa. Naturalmente le cifre non raccontano mai tutta la storia, e Joe va sempre oltre i metadati per arrivare al cuore dell'immagine. Ogni racconto tratta l'arte e la tecnica, svelando il modo in cui Joe si rapporta al soggetto e quali sono i motivi delle sue scelte tecniche e creative. Scritto con la leggerezza e lo humor che contraddistinguono l'autore, Fotografare la luce è ricchissimo di intuizioni e informazioni, e della conoscenza e della saggezza che nascono da un lavoro sul campo sempre attento, appassionato e meditato.

Enhanced with more than two hundred color illustrations and composition, equipment, and light information, this instructional guide provides helpful techniques, tips, and secrets for making up-close photographs powerful pieces of unique art.

Come si cattura un'emozione? Dove si trova, quanto si aspetta, come si inquadra? Simone Bramante mette a nudo il suo processo creativo raccontando la sua esperienza di narratore per immagini. Attraverso una serie di aneddoti e riflessioni che riguardano le componenti fondamentali della fotografia, dall'estetica al colore, dallo spazio al tempo, dalla costruzione di un racconto al messaggio, Bramante insegna a fotografare «con il cuore e la mente», mostrando come ogni scatto sia «una personale fotosintesi della realtà». Partendo da una profonda autoanalisi, passando per la riscoperta del quotidiano e della semplicità, spiega come creare immagini piene di luce e speranza, per ispirare e far sognare. Un libro pratico ed emozionante, capace di accendere l'entusiasmo e arricchire le competenze di chi vuole catturare la bellezza di ciò che vede con gli occhi e sente col cuore.

The source of any photograph is not the camera or even the scene viewed through the viewfinder-it is the mind of the photographer: this is where an image is created before it is committed to a memory card or film. In The Photographer's Mind, the follow-up to the international best-seller, The Photographer's Eye, photographer and author Michael Freeman unravels the mystery behind the creation of a photograph. The nature of photography demands that the viewer constantly be intrigued and surprised by new imagery and different interpretations, more so than in any other art form. The aim of this book is to answer what makes a photograph great, and to explore the ways that top photographers achieve this goal time and time again. As you delve deeper into this subject, The Photographer's Mind will provide you with invaluable knowledge on avoiding cliché, the cyclical nature of fashion, style and mannerism, light, and even how to handle the unexpected. Michael Freeman is the author of the global bestseller, The Photographer's Eye. Now published in sixteen languages, The Photographer's Eye continues to speak to photographers everywhere. Reaching 100,000 copies in print in the US alone, and 300,000+ worldwide, it shows how anyone can develop the ability to see and shoot great digital photographs.

First published in 2013. Routledge is an imprint of Taylor & Francis, an informa company.

When it comes to photography, it's all about the light. After spending more than thirty years behind the lens working for National Geographic, Time, Life, and Sports Illustrated, Joe McNally knows about light. He knows how to talk about it, shape it, color it, control it, and direct it. Most importantly, he knows how to create it...using small hot shoe flashes. In The Hot Shoe Diaries, Joe brings you behind the scenes to candidly share his lighting solutions for a ton of great images. Using Nikon Speedlights, Joe lets you in on his uncensored thought process: often funny, sometimes serious, always fascinating to demonstrate how he makes his pictures with these small flashes. Whether he's photographing a gymnast on the Great Wall, an alligator in a swamp, or a fire truck careening through Times Square, Joe uses these flashes to create great light that makes his pictures sing.

A comprehensive guide to lighting techniques in digital photography covering topics including working with artificial light and daylight.
