There are no short-cuts to becoming a Witch. Traditionally, students take a year and a day to prepare for their initiation into the Craft. Based on this age-old custom, Wicca: A Year and a Day is a one-of-a-kind daily guide that introduces Witchcraft over a 366-day cycle. Ideal for solitary students, this intensive study course teaches the core content of Wiccan practice: the tides of time, the wonders of the seasons, the ways of herbs and magic, the mysticism of the Old Ones, and the inner disciplines of seers and sages. Daily lessons include exercises, Wiccan theology and lore, and discussions relating to circle work, magical correspondences, holidays, deities, tools, healing, and divination.

The mortal kingdoms are caught up in a shared catastrophe, cursed with sterility by the magic of the dark elves. Still, what elves have caused they may perhaps put right. Humanity's last hope hinges on a magical talisman—the Pica Stone. One of only nine solid objects ever created by magic, the Pica Stone was shattered in the days of the last Wizards. But when Captain, oldest of the elves, joins with his fellow light elves to work a spell to draw together all the scattered pieces of this legendary gem, eight shards remain missing, lost on worlds throughout the planes of existence. The elves spell-shift a party of questers to each of these worlds to find the shards. Among the chosen are the Renshai warrior Kevral, her husband Ra-khir the knight, and Tae, a newly made prince and former thief. Each world offers unique challenges, but with the extinction of the human race as the price of failure, there can be no turning back....

The astrologer-physician Richard Napier (1559-1634) was not only a man of practical science and medicine but also a master of occult arts and a devout parish rector who purportedly held conversations with angels. This new interpretation of Napier reveals him to be a coherent and methodical man whose burning desire for certain, true knowledge contributed to the contemporary venture of putting existing knowledge to useful ends. Originally trained in theology and ordained as an Anglican priest, Napier later studied astrological medicine and combined astrology, religious thought, and image and ritual magic in his medical work. Ofer Hadass draws on a remarkable archive of Napier's medical cases and religious writings—including the interviews he claimed to have held with angels—to show how Napier's seemingly inconsistent approaches were rooted in an inclusive and coherent worldview, combining equal respect for ancient authority and for experientially derived knowledge. Napier's endeavors exemplify the fruitful relationship between religion and science that offered a well-founded alternative to the rising mechanistic explanation of nature at the time. Carefully researched and compellingly told, *Medicine, Religion, and Magic in Early Stuart England* is an insightful exploration of one of the most fascinating figures at the intersection of medicine, magic, and theology in early modern England and of the healing methods employed by physicians of the era.

Story of Little Black Mingo is the exciting tale of a little girl who befriends a Mongoose after being kidnapped by a horrible Mugger. With the help of the Mongoose, Little Black Mingo must avoid being eaten as she tries to escape the island where the old Mugger is keeping her. A story of adventure, creativity, and luck, Little Black Mingo has been treasured by children everywhere since it was first written in 1901, and this delightfully illustrated edition brings the tale to life once more for the enjoyment of readers of all ages. Born in Edinburgh, Scottish author HELEN BANNERMAN (1862-1946) spent more than thirty years of her life in India, where she started writing illustrated letters to her two daughters, who were being educated in Scotland. Those letters became the basis for Bannerman's first and most famous book, *The Story of Little Black Sambo*, as well as nine more tales of clever children overcoming the odds, including *Story of Little Black Mingo* and *Story of Little Black Quibba*.

Despite the growing interest in Apuleius' *Apologia* or *Pro se de magia*, a speech he delivered in AD 158/159 to defend himself against the charge of being a magus, the only comprehensive study on this speech and magic to date is that by Adam Abt (1908). The aim of this volume is to shed new light on the extent to which Apuleius' speech reveals his own knowledge of magic, and on the implications of the dangerous allegations brought against Apuleius. By analysing the *Apologia* sequentially, the author does not only reassess Abt's analysis but proposes a new reconstruction of the prosecution's case, arguing that it is heavily distorted by Apuleius. Since ancient magic is the main topic of this speech, an extensive discussion of the topic is provided, offering a new semantic taxonomy of magus and its cognates. Finally, this volume also explores Apuleius' forensic techniques and the Platonic ideology underpinning his speech. It is proposed that a Platonising reasoning — distinguishing between higher and lower concepts — lies at the core of Apuleius' rhetorical strategy, and that Apuleius aims to charm the judge, the audience and, ultimately, his readers with the irresistible power of his arguments.
