Amidst the glittering optimism defining America's post-War period, the great metropolis of New York City is watched over by a legion of costumed superheroes. Half a century later, the heroes are all gone, and New York has collapsed into seemingly irreparable ruin. Throughout the 1950s, superhuman beings with fantastic abilities face off against bizarre enemies and absurd situations in their ongoing fight to uphold justice, defend the innocent, and safeguard the public welfare. In the early 21st century, a group of young superhumans is mentored by the few former heroes that remain, while monstrous gangsters and crazed supervillains battle for control of New York's decrepit husk. This epic saga, spanning two distinct eras, details the exploits of such magnificent champions as the patriotic Star-Spangled Angel, the sorcerer Dr. Obscura, the nigh omnipotent Super-Atomic Man, and the antisocial Urban Ranger, and the incredible adventures they undertake at the height of the Superheroic Age, while simultaneously examining the mystery of their disappearance, and the events that mold the shape of the dystopian New York of today.

In this biography, William F. Trimble examines the pioneering work of Glenn Curtiss and his role in the origins of aviation in the U.S. Navy in the years up to and through World War I. A self-taught mechanic and inventor, Curtiss was a key figure in the development of the airplane during the early part of the century and his contributions to aviation are well known. This book's careful examination of his partnership with the Navy breaks new ground in revealing significant new details of his contributions. Curtiss's links to the Navy came as result of aviation advocates within the Navy, chief among them Captain Washington I. Chambers, who recognized that the Navy had special requirements for airplanes and their operations, and for aviators and their training. Curtiss helped meet the special requirements of the service for aircraft, particularly those with the potential for operating with naval vessels at sea or in conducting long-distance flights over water. He also was instrumental in training the first naval aviators. Curtiss and the Navy continued their collaboration through World War I, reaching a climax in 1919 with the first transatlantic flight of the famed Navy-Curtiss NC flying boat. This book addresses the broader implications of the Curtiss-Navy collaboration in the context of the longstanding trend of government-private cooperation in the introduction and development of new technologies. It also explores the interactive dynamics of weapons procurement and technological change within a large and entrenched bureaucracy and helps lay to rest the persistent myth that the Navy resisted the introduction of aviation

Lucien needs nothing and no one...until he meets her. Werewolves are disappearing and it's up to Pack Guardian Lucien Sauvage to track them down and eliminate any future threat. When the trail leads to a gentlemen's club—and the beautiful Catty Steele—Lucien realizes asking the suspicious dancer for help might be his only hope, if he can resist the temptation to touch her long enough to earn her trust. Catty Steele has no reason to trust any man, let alone an alpha werewolf who's used to giving orders. The only thing she wants is out. Out of this club. Out of this town. Out of this go-nowhere life. Unfortunately, the club's owner has no intention of letting her go. But when Lucien asks for her help, she can't say no, despite the risk. She'll help him, if he can keep their alliance a secret, and as long as he understands that working with him doesn't

**Business Case Studies and Their Relevance to Management Education** Many B-schools outside India have adopted the case study methodology for teaching almost in all branches of management studies. This trend has been seen in India also, many premier B schools have implemented case study – based methodology as an important pedagogical tool in management education. However there is a severe shortage in Indian case studies through which the B-schools can provide an industry insight to its students. Objectives of use of case study methodology The main objectives of using case-based teaching as a major pedagogical tool in B-schools are as follows: 1. To facilitate students ' concept development capabilities through exposure to real-life problems in Industries 2. To enable students to correlate theoretical topics with the techniques used in analysing complex issues in business situations 3. To develop skills using which students can develop application matrix for the theoretical topics for real-life problem analysis and resolution techniques The present environment The academic environment across the world to is facing a major disruption on account the global pandemic COVID 19 compelling switching over to online/blended versions of teaching and learning process. The main drivers will be use of tools such as case methodology and simulation exercises for ensuring experiential learning ASMs Initiative Realizing this requirement ASM Group with nearly 250 business Case Studies developed by its faculty takes pleasure in offering these cases by publishing in case volumes The case studies in this book are appropriate for the courses in management studies ASM group of Institutes is certain that this book ' A Bouquet of Business Case Studies ' published by Become Shakespeare.com will receive excellent response from the faculty , students and industry executives in India and abroad.
