Fireworks erupt over Rio de Janeiro's Copacabana Beach on December 31, delighting the hundreds of thousands of people who have come to celebrate both the Feast of Iemanjá and New Year's Eve. Reflecting Brazil's cultural diversity, this traditional spectacle combines native, African, and Christian beliefs and rituals. Clad in blue and white, the colors of Iemanjá, the goddess of all waters, celebrants cast offerings into the water just before midnight, asking Iemanjá for her protection and blessing. The oferendas includes flowers, food, candles, and perfume. At the stroke of midnight, fireworks explode overhead, and the throngs sing and dance to celebrate the new year. Book jacket.

Applied Geography, A World Perspective reviews progress in applied geography in different regions of the world. It does this through the eyes of an international panel of highly regarded academic practitioners. The book offers new prospects on the use of established approaches and explores exciting new territories. Together, the contributors provide a comprehensive picture of applied geography today. This book is of relevance to faculty and graduate students in the fields of geography, planning, public policy, regional science and other related social and behavioural sciences.

The Handbook is written for academics, researchers, practitioners and advanced graduate students. It has been designed to be read by those new or starting out in the field of spatial analysis as well as by those who are already familiar with the field. The chapters have been written in such a way that readers who are new to the field will gain important overview and insight. At the same time, those readers who are already practitioners in the field will gain through the advanced and/or updated tools and new materials and state-of-the-art developments included. This volume provides an accounting of the diversity of current and emergent approaches, not available elsewhere despite the many excellent journals and te- books that exist. Most of the chapters are original, some few are reprints from the Journal of Geographical Systems, Geographical Analysis, The Review of Regional Studies and Letters of Spatial and Resource Sciences. We let our contributors - velop, from their particular perspective and insights, their own strategies for m- ping the part of terrain for which they were responsible. As the chapters were submitted, we became the first consumers of the project we had initiated. We gained from depth, breadth and distinctiveness of our contributors ' insights and, in particular, the presence of links between them.
