In this extremely positive, motivational, and often laugh-out-loud memoir, Jake Paul pauses long enough from his supercharged day-to-day as a nineteen year old social media heartthrob and costar on the Disney Channel series Bizaardvark to share his takes on life, love, fame, and shooting for the moon. Growing up as a regular kid in Ohio, Jake Paul always knew he wanted to do something big, but he wasn ' t sure what that thing was—that is, until he found his calling as one of Vine ' s most famous comedians. As a high school sophomore, Jake began making comedy videos with his older brother, Logan, and posting them online. With every carefully staged prank, Jake and Logan ' s following grew—and after a few stumbling blocks, Jake finally forged his own way. Eventually, he traded his childhood home in Cleveland for sunny, sparkling Hollywood. In You Gotta Want It, Jake reflects on the path that led him to stardom. From learning the value of a disciplined work ethic, to achieving his goals and aspirations along the way to digital celebrity, to the crazy behind-the-scenes details of his journey as a creator and actor, Jake relates the most hysterical and intimate details of his life thus far—all with the signature humor, honesty, and unstoppable attitude that have won him millions of devoted followers.

Makeup in the World of Beauty Vlogging studies the cultural phenomenon of the beauty vlog as a space where audiences and vloggers find a voice and a means of personal expression via the potentially subversive power of makeup and social media.

Drawing on historical cases of the American South before and after the Civil War, Europe – especially Germany – between the world wars, and the United States in Vietnam and its aftermath, this book takes a historical approach to explain the problems of capitalism and democratic leadership in western democracies today. Capitalist democracies proclaim equality, material prosperity and comfort but produce extreme differences in wealth and power. They promise security and peace, but deliver frequent wars. The promises broken, elites often turn to other visions- partially borrowed from feudalism- to win public support. Nations turn to honor, nobility and war as a way of winning over workers and legitimating the capitalist system itself. Capitalism ' s contradictions often have produced a cultural divide. One side, "cosmopolitans" – urban, see themselves as citizens of the world, not one region or country – identify as secular, preach multi-culturalism, entertain state welfare systems, and are cautious about going to war. Their opponents, "traditionalists," breed among people who feel left behind, anxiousness and insecurity, often embracing community, tradition, God and family. The devastation of the world wars and the Third Reich led Europe to forgo visions of empire, militarism and glory and focus upon improving the quality of life for their own citizens. Although the United States does not need to experience comparable trauma, they should follow Europe ' s example- forget glory and instead build a better life for the American people. The last chapter will consider how such a change could emerge in the US and who might help fight for it.
