The number one textbook for intermediate macroeconomics courses since its first edition, this title is known for conveying the cutting edge in macroeconomics theory, research, and policy to the classroom, explaining complex concepts with exceptional clarity. This new edition is no exception, with Greg Mankiw streamlining his hallmark approach and adding powerful new digital learning options while improving the book's already exemplary focus on teaching students to apply the analytical tools of macroeconomics to current events and policies. This comprehensive text is the ideal accompaniment to undergraduate courses in Macroeconomics.

In writing this textbook, Mankiw has tried to put himself in the position of someone seeing economics for the first time. The author's conversational writing style is superb for presenting the politics and science of economic theories to tomorrow's decision-makers. Because Mankiw wrote it for the students, the book stands out among all other principle texts by intriguing students to apply an economic way of thinking in their daily lives. Receiving such praise as "perhaps the best ever" textbook in economic principles, it's no wonder Mankiw's prize project has quickly become one of the most successful books ever to be published in the college marketplace.

Now readers can master the basics of economics with the help of the most popular introductory book in economics today that is widely used around the world -- Mankiw's ESSENTIALS OF ECONOMICS, 8E. With its clear and engaging writing style, this book emphasizes only the key material that readers are likely to find most interesting about the economy, particularly if they are studying economics for the very first time. Reader discover interesting coverage of the latest relevant economic developments with real-life scenarios, useful economic facts, and clear explanations of the many ways essential economic concepts play a role in the decisions that individuals make every day. Now firmly established as one of the leading economics principles texts in the UK and Europe, this exciting new fourth edition of Economics by N. Gregory Mankiw (Harvard University) and Mark P. Taylor (Washington University), has been fully

updated. New topics have been added in including theories on, for example, Marxist and Feminist theories on labour giving wider context to economic issues. A new chapter on Issues in Financial markets has been added covering the financial crisis and its causes and the final chapter has been updated to reflect the post-crisis world and how theories of the crisis have emerged.
