Author Steve Sharp tells his students that the thesis statement is the sun around which EVERYTHING in their paper orbits. Every sentence must fall within its gravitational pull and obey rational orbital laws. Otherwise chaos ensues. If you really want to succeed in the academic world, you simply can't afford to leave your readers scratching their heads after they've read your paper, wondering, "What's the point of this? Why was this written?" MASTERING THE THESIS STATEMENT teaches you just about everything you need to know to write an effective thesis statement and improve the quality of your academic writing. Because writing is such hard work, you may have to revise your thesis many, many times before you discover the gem that shines brightest - a thesis that not only suits the content and purpose of your paper but also truly reflects what you're trying to say.

"In the United States, Raymond Queneau (1903-1976) is known mainly for his novel *Zazie dans le metro*, which was made into a film by Louis Malle, for *Exercises in Style*, and for being the founder and one of the most important members of the literary movement known as Oulipo. In France and much of Europe Queneau is known for his prolific and wide ranging writings. During his lifetime some 18 novels, 10 volumes of poetry, 7 volumes of essays, and countless published writings, commentaries, and reviews kept him in public view (and continue to do so today as much of his writing is still in print in France). His reputation as a writer continues to grow with new biographies, critical writings, and anthologies appearing every year. An explorer of linguistics as well as a mathematician, he often combined his love of both subjects such that the essence of his writings resides not in its "content" but in the sounds and the form of the text. He often argued that the real subject of his work is language itself. Because of this many of his novels, and especially his poems, are virtually impossible to translate into English as they are based on spoken versus literary French, puns, street slang, and complex variations of word play and spelling. *Les Ziaux (Eyeseas)* presents a survey of his poems as written from his early Surrealist days of the 1920's through to 1943 and is representative of Queneau's range of poetic voices."--BOOK JACKET.

Between 1660 and 1820, Great Britain experienced significant structural transformations in class, politics, economy, print, and writing that produced new and varied spaces and with them, new and reconfigured concepts of gender. In mapping the relationship between gender and space in British literature of the period, this collection defines, charts, and explores new cartographies, both geographic and figurative. The contributors take up a variety of genres and discursive frameworks from this period, including poetry, the early novel, letters, and laboratory notebooks written by authors ranging from Aphra Behn, Hortense Mancini, and Isaac Newton to Frances Burney and Germaine de Staël. Arranged in three groups, Inside, Outside, and Borderlands, the essays conduct targeted literary analysis and explore the changing relationship between gender and different kinds of spaces in the long eighteenth century. In addition, a set of essays on Charlotte Smith ' s novels and a set of essays on natural philosophy offer case studies for exploring issues of gender and space within larger fields, such as an author ' s oeuvre or a particular discourse. Taken together, the essays demonstrate space ' s agency as a complement to historical change as they explore how literature delineates the gendered redefinition, occupation, negotiation, inscription, and creation of new spaces, crucially contributing to the construction of new cartographies in eighteenth- and early nineteenth-century England.

Blake Taylor's mother first suspected he had ADHD when he, at only three years of age, tried to push his infant sister in her carrier off the kitchen table. As time went by, Blake developed a reputation for being hyperactive and impulsive. He launched rockets (accidentally) into neighbor's swimming pools and set off alarms in museums. Blake was diagnosed formally with ADHD when he was five years old. In ADHD and Me, he tells about the next twelve years as he learns to live with both the good and bad sides of life with ADHD.
