Freedom of information is a principle commonly associated with the United States ' First Amendment traditions or digital-era technology boosters. Barriers Down reveals its unexpected origins in political, economic, and cultural battles over analog media in the mid-twentieth century. Diana Lemberg traces how the United States shaped media around the world after 1945 under the banner of the " free flow of information, " showing how the push for global media access acted as a vehicle for American power. Barriers Down considers debates over civil liberties and censorship in Nazi Germany, the Soviet Union, and elsewhere alongside Americans ' efforts to circumvent foreign regulatory systems in the quest to expand markets and bring their ideas to new publics. Lemberg shows how in the decades following the Second World War American free-flow policies reshaped the world ' s information landscape, though not always as intended. Through burgeoning information diplomacy and development aid, Washington diffused new media ranging from television and satellite broadcasting to global English. But these actions also spurred overseas actors to articulate alternative understandings of information freedom and of how information flows might be regulated. Bridging the historiographies of the United States in the world, human rights, decolonization and development, and media and technology, Barriers Down excavates the analog roots of digital-age debates over the politics and ethics of transnational information flows.

The rising popularity of political communication research warrants this second volume. In 1990, the International Association for Mass Communication Research (IAMCR) elevated the Political Communication Research Group (PCRG) to section status. The American Political Science Association recently formed a Political Communication section, and the International Communication Association's Political Communication section continues to thrive. The rising popularity of political communication research warrants this second volume. In 1990, the International Association for Mass Communication Research (IAMCR) elevated the Political Communication Research Group (PCRG) to section status. The American Political Science Association recently formed a Political Communication section, and the International Communication Association's Political Communication section continues to thrive.

Voilà d'ésormais plus de 10 000 ans que la civilisation occidentale s'est installée et voilà 10 000 ans qu'elle viole le sens même de la nature : la vie. En s'appropriant sans concession ce qui l'entourait, l'homme de l'Ouest a vu son horizon ployer sous la charge de la destruction qu'il lui avait lui-même réalisée. Sommes-nous des lycanthropes ou des vampires? Ces monstres si terrifiants qui sortent de notre imagination sont-ils en réalité la copie de notre comportement dévastateur? Prédateurs, nous pompons sans remords les énergies qui nous entourent. Jusqu'où ira-t-on?.

The impact of the information society' are multiform and transdisciplinary. There are few areas of social, political and economic life that have not been affected or challenged by the new technologies of information and communication. In this short introduction, Armand Mattelart unpacks the notion of the information society, and examines why it has become the dominant paradigm for social change in the 21st Century. Critically, he also asks why the notion has come to dominant in the absence of any critical examination of the conditions under which it has been produced. Combining a long-term historical and geopolitical perspective, Mattelart questions the axioms used to legitimate the Information Society and critically assesses the ways in which it has been conceptualised as a theoretical concept as well as policy making tool. This introduction will be of interest to all students of media and communication, as well as social scientists in general.

This book is a key resource on the foundations of Marxist Media, Cultural and Communication Studies. It presents 18 contributions that show how Marx ' s analyses of capitalism, the commodity, class, labour, work, exploitation, surplus-value, dialectics, crises, ideology, class struggles, and communism help us to understand media, cultural and communications in 21st century informational capitalism.

A critique of the "American Empire" focuses on the role of communications corporations in controlling information and speech throughout the world.
