Fundamentals of Atmospheric Physics emphasizes the interrelationships of physical and dynamical meteorology. The text unifies four major subject areas: atmospheric thermodynamics, hydrostatic equilibrium and stability, atmospheric radiation and clouds, and atmospheric dynamics. These fundamental areas serve as cornerstones of modern atmospheric research on environmental issues like global change and ozone depletion. Physical concepts underlying these subject areas are developed from first principles, providing a self-contained text for students and scholars from diverse backgrounds. The presentation is Lagrangian (single-body problems) in perspective, with a balance of theory and application. Each chapter includes detailed and extensive problems; selected answers are provided, as are appendices of various constants. The text requires a thorough foundation in calculus. Presents a comprehensive introduction to atmospheric thermodynamics, hydrostatics, radiation and clouds, and dynamics Develops concepts from first principles, providing a self-contained volume for readers from diverse backgrounds Emphasizes the interaction of physical processes shaping global problems of atmospheric energetics, transport, and chemistry Provides a balance of theory and applications, with examples drawn from a wide range of phenomena figuring in global atmospheric research Extensively illustrated with global satellite imagery and analyses and photographs of laboratory simulations Exercises apply to a wide range of topical problems

Cara always knew life on planet L'eihr would be an adjustment. With Aelyx, her L'eihr boyfriend, back on Earth, working to mend the broken alliance between their two planets, Cara is left to fend for herself at a new school, surrounded by hostile alien clones. Even the weird dorm pet hates her. Things look up when Cara is appointed as human representative to a panel preparing for a human colony on L'eihr. A society melding their two cultures is a place where Cara and Aelyx could one day make a life together. But with L'eihr leaders balking at granting even the most basic freedoms, Cara begins to wonder if she could ever be happy on this planet, even with Aelyx by her side. Meanwhile, on Earth, Aelyx, finds himself thrown into a full-scale PR campaign to improve human-L'eihr relations. Humans don't know that their very survival depends on this alliance: only Aelyx's people have the technology to fix the deadly contamination in the global water supply that human governments are hiding. Yet despite their upper hand, the leaders of his world suddenly seem desperate to get humans on their side, and hardly bat an eye at extremists' multiple attempts on Aelyx's life. *The Way* clearly needs humans' help...but with what? And what will they ask for in return?

What goes around comes around. That's justice. Especially in small towns where everybody knows how many eggs you ate for breakfast before you've even left the Scales of Justice Cafe. Funny thing, though. Usually what everybody thinks they know-they really don't. Take the folks in Turkey Creek. Oh, everybody knows Maggie Kincaid doesn't speak to her father. They think they know why. But they don't. They know Billy Brayton died twenty-five years back. Too bad nobody told him. Because now he's home. And it's time to right some past wrongs. Time for justice. Country Justice."
