A never-before published tale by the author of the best-selling Hittite Warrior, carries the reader back to Ancient Egypt and biblical Jerusalem. It is 701 B.C-rule of the Kushite dynasty in ancient Egypt. Young Prince Taharka, a very minor royal son, succeeds unexpectedly to the throne of Kush and Egypt-a divine rulership. It's not long, however, before a treacherous plot pushes him into sudden exile and into the hands of Amos, an emissary of King Hezekiah seeking help against the Assyrians. Posing as a medical assistant, Taharka journeys with Amos to Judea where he encounters two kings in conflict. His true identity suddenly uncovered, he must choose with whom he will fight-the mighty Assyrian, Sennacherib, promising alliance or Hezekiah, the Jew who trusts in Yahweh. A novel inspired by research on the historical King Taharka and his period.

The Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the 'tension' and 'compression' forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all aspects of the equipment and helps you select the right chainsaw and personal protection equipment for your needs. Trouble-shooting charts are included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw.

In recent years biocompatible polymers for injuries and wounds have seen advances and innovations that have outpaced the growing field's literature. In this book Dr. Jan W. Gooch, a National Research Council Research Associateship Award recipient, reveals how innovative polymer technology can be applied to the common combat and trauma wounds associated with damaged soft tissue and bleeding. The scope of his investigation spans four distinct devices for wounds, liquid and particulate barrier dressings for soft tissue wounds, sutureless tissue adhesives, antibacterial nanoemulsions, one-hand operated and automatic tourniquets for the battlefield.

This time, Margot from Caestion wins a travel grant for excelling in the Roman history exam. The randomly picked destination is Via Belgica, a 450-km Roman road (50 BC) stretching from France to Germany - through Belgium and The Netherlands. Written to inform rather to impress, the heavily illustrated "Via Belgica" with its surrealistic personages on the real background adds another adventure to "Margot on a Roman Road" series, along with "Via Aurelia," "Via Claudia-Augusta," "Via Domitia," "Via Fossa," "Via Maris" and "Via Militaris." Where you still are unable to find the destination of your heart, the other 80+ travel diaries from this author may offer a pleasant remedy.
