The consumer electronics market has never been as awash with new consumer products as it has over the last couple of years. The devices that have emerged on the scene have led to major changes in the way consumers listen to music, access the Internet, communicate, watch videos, play games, take photos, operate their automobiles—even live. Digital electronics has led to these leaps in product development, enabling easier exchange of media, cheaper and more reliable products, and convenient services. Known for her well-reasoned and passionately held beliefs about architecture, Ada Louise Huxtable has captivated readers across the country for decades, in the process becoming one of the best known critics in the United States. Her brilliance over so many years is unmatched, and her range has always been vast—from a plea to save a particular architectural treasure to an ongoing discussion about whether modern architecture is dead. Her keen eye and vivid writing have reinforced to readers how important architecture is and why it continues to be both controversial and fascinating. Since so much of her writing has been in newspapers, it has quickly become unavailable to her many fans. On Architecture will bring together her best work from the New York Times, New York Review of Books, her more recent essays in the Wall Street Journal, and her various books. She is personally selecting and organizing the pieces into sections like "Art and Culture" and "The Art of Architecture," and is revising them as needed to bring them up to date. Whether you love modern
