The Algebraic Theory of Switching Circuits covers the application of various algebraic tools to the delineation of the algebraic theory of switching circuits for automation with contacts and relays. This book is organized into five parts encompassing 31 chapters. Part I deals with the principles and application of Boolean algebra and the theory of finite fields (Galois fields). Part II emphasizes the importance of the sequential operation of the automata and the variables associated to the current and to the contacts. This part also tackles the recurrence relations that describe operations of the network and the principles of the so-called characteristic equations. Part III reviews the study of networks with secondary elements other than ordinary relays, while Part IV focuses on the fundamentals and application of multi-position contacts. Part V considers several topics related to circuit with electronic elements, including triodes, pentodes, transistors, and cryotrons. This book will be of great value to practicing engineers, mathematicians, and workers in the field of computers.

Esther Amini grew up in Queens, New York, during the free-wheeling 1960s. She also grew up in a Persian-Jewish household, the American- born daughter of parents who had fled Mashhad, Iran. In CONCEALED she tells the story of being caught between these two worlds: the dutiful daughter of tradition-bound parents who hungers for more self-determination than tradition allows. Exploring the roots of her father's deep silences and explosive temper, her mother's flamboyance and flights from home, and her own sense of indebtedness to her two Iranian-born brothers, Amini uncovers the story of her parents' early years in Mashhad, Iran's holiest Muslim city; the little known history and persecution of Mashhad's underground Jews; the incident that steeled her mother's resolve to leave; and her parents' arduous journey to the United States, where they found themselves facing a new threat to their traditions: the threat of freedom. Determined to protect his only daughter from corruption, Amini's father prohibits talk, books, higher education, and tries to push her into an early Persian marriage. Can she resist? Should she? Focused intently on what she stands to gain, Amini eventually comes to see what she also stands to lose: a family and community bound together by food, celebrations, sibling escapades, and unexpected acts of devotion by parents to whom she feels invisible. In this poignant, funny, entertaining and uplifting memoir, Amini documents with keen eye, quick wit, and warm heart, how family members build, buoy, wound, and save one another across generations; how lives are shaped by the demands and burdens of loyalty and legacy; and how she rose to the challenge of deciding what to keep and what to discard.
