This is a translation of a manual utilized by the Soviet Union to train soldiers in the techniques of infiltration, reconnaissance, and battlefield surveillance. It emphasizes the high standard the Soviet, and later, Russian military places on physical fitness as a fundamental requirement for mission success. The manual concludes with instructions for the layout and construction of specialized courses for perfecting the skills illustrated within this manual. These tactical courses have been found in Columbia, Chechnya, Afghanistan, Iraq, and Syria. FARC, Al Qaeda, and ISIS are known to use these tactical courses to train their recruits. Clearly these techniques are quickly spreading through conflict zones worldwide. The drills are simple, easy to learn, and easily retained and are well suited for training motivated but unskilled recruits. As the Spetsnaz say: 'Do more with less.'

This training manual comprehensively examines the methods and methods of training an army scout. The technique of concealed and noiseless movement, methods of conducting reconnaissance of various objects, techniques and methods of orientation, techniques of hand-to-hand combat are aptly and visually shown. Recommendations are given to ensure and preserve the fighting efficiency of personnel in reconnaissance. The publication is intended for commanders of subdivisions of the Land Forces and cadets of military schools.

A rare glimpse into how Soviet Spetsnaz and KGB units protected and defended their country from perceived enemies - inside and outside its borders. Includes special sections for Alpha Teams on assassination, sabotage and kidnapping.

When the shadowy, notorious Spetsnaz were first formed, they drew on a long Soviet tradition of elite, behind-the-lines commando forces from World War II and even earlier. Throughout the 1960s-70s they were instrumental both in projecting Soviet power in the Third World and in suppressing resistance within the Warsaw pact. As a powerful, but mysterious tool of a world superpower, the Spetsnaz have inevitably become the focus of many 'tall tales' in the West. In this book, a peerless authority on Russia's military Special Forces debunks several of these myths, uncovering truths that are often even more remarkable. Now, since the chaotic dissolution of the USSR and the two Chechen Wars, Russian forces have seen increasing modernization, involving them ever more in power-projection, counter-insurgency and anti-terrorism and the Spetsnaz have been deployed as a spearhead in virtually all of these

operations. This book offers a unique, absorbing guide to the secrets of the Spetsnaz, their most noteworthy missions and personalities, but is also packed with details such as orders-of-battle, equipment and operational doctrine.

In this encyclopedic book, Lewis provides insights into the origins, training, tactics, weapons and achievements of special forces and special mission units throughout the world, focusing particularly on US and UK forces. He also looks at the codes that bind the members of these elite units together. He reveals training secrets in everything from wilderness survival to hand-to-hand combat. In doing so, he draws extensively on biographies, autobiographies, training manuals, interviews and press coverage of key operations. The elite forces covered include: The British Army's Special Air Service (SAS), established in 1950, which has served as a model for the special forces of many countries. Its counter-terrorist wing famously took part in the hostage rescue during the siege of the Iranian Embassy in London in 1980. The Parachute Regiment, the airborne infantry element of 16 Air Assault Brigade, which spearheads the British Army's rapid intervention capability. It is closely linked to United Kingdom Special Forces. The US Navy's SEALs (Sea, Air, Land Teams), trained to conduct special operations in any environment, but uniquely specialised and equipped to operate from and in the sea. Together with speedboat-operating Naval Special Warfare Combatant-Craft Crewmen, they form the operational arm of the Naval Special Warfare community, the Navy component of the US Special Operations Command. Their special operations include: neutralizing enemy forces; reconnaissance; counter-terrorism (famously in the killing of Osama bin Laden); and training allies. The US Army's Delta Force: The Special Mission Unit, 1st Special Forces Operational Detachment-Delta (1st SFOD-D), known simply as Delta Force, the Army component of Joint Special Operations Command. Its role is counter-terrorism, direct action and national intervention operations, though it has the capability to conduct many different kinds of clandestine missions, including hostage rescues and raids. The US Army Rangers, a light infantry combat formation under the US Army Special Operation Command. The Green Berets - motto: 'to free the oppressed' - trained in languages, culture, diplomacy, psychological warfare and disinformation. Russia's Spetsnaz, whose crack anti-terrorist commandos ended the Moscow theatre siege, and who have a reputation for being among the world's toughest and most ruthless soldiers. Spetsnaz units saw extensive action in Afghanistan and Chechnya, often operating far behind enemy lines. Israeli Special Forces, especially Shayetet 13 (Flotilla 13), whose motto, in common with the rest of the Israeli military, is 'Never again', a reference to the Holocaust. They are particularly adept at the specifically Israeli martial art Krav Maga, which they dub 'Jew-jitsu'.

Examines techniques used by special forces around the world: the lethal strikes of the Spetsnaz, locks and constrictions used by the Egyptian special forces, U.S. Army throws and holds, and elementary methods taught to Britain's Parachute Regiment.

Viktor Suvorov is a Soviet army officer who has defected to the West. Here is the full story of the Spetsnaz forces, the Soviet army's secret killer elite. This is the first comprehensive insight for the West into a Soviet "army within an army" whose existence has been known until recently only to a few highly placed people--most of whom would deny it. The spetsnaz Soviet special forces are one of the more shadowy and ruthless secret special forces in the world. Controlled by military intelligence (the GRU), spetsnaz units are recruited from the ranks of the toughest officers and men in the Soviet Army, the cutting edge of Soviet military might. In modern warfare their primary task is the destruction of enemy tactical nuclear weapons, but the training of anyone selected for spetsnaz prepares him or her for an unlimited range of tasks--from undercover activity as a member of a Soviet Olympic sports team to piloting a midget submarine. As an officer in the GRU, the author was directly involved in the control and planning of spetsnaz. In this revealing and sometimes shocking book, he talks about his own experience; about the military code of an armed force that kills its own wounded; about the weapons, strategy, and training. For anyone interested in the true military capability of the Soviet Union, this book is essential reading.
