Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America ' s premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede ' s wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid ' s, handle like a pro ' s. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension ' s condition. He outlines testing procedures that will help you gauge how well you ' re improving your suspension, along with your riding. And, if you ' re inclined to perfect your bike ' s handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Longtime leader in the luxury goods sector and former Chairman of LVMH Moët Hennessy Louis Vuitton North America reinvents the art and science of brand-building under the rubric of Aesthetic Intelligence. In a world in which people have cheap and easy access to most goods and services, yet crave richer and more meaningful experiences, aesthetics has become a key differentiator for most companies and a critical factor of their success and even their survival. In this groundbreaking book, Pauline Brown, a former leader of the world ' s top luxury goods company and a pioneer in identifying the role of aesthetics in business, shows executives, entrepreneurs, and other professionals how to harness the power of the senses to create products, services, and experiences that stand out, resonate with their customers, and create long-term value for their businesses. The power is rooted in Aesthetic Intelligence—or " the other AI, " as Brown refers to it. Aesthetic Intelligence can be learned. Indeed, people are born with far more capacity than they use, but even those that are naturally gifted must continue to refine their skills, lest their aesthetic advantage atrophy. Through a combination of storytelling and practical advice, the author shows how aesthetic intelligence creates business value and how executives, entrepreneurs and others can boost their own AI and successfully apply it to business. Brown offers research, strategies and practical exercises focused on four essential AI skills. Aesthetic Intelligence provides a crucial roadmap to help business leaders build their businesses in their own authentic and distinctive way. Aesthetic Intelligence is about creating delight, lifting the human spirit, and rousing the imagination through sensorial experiences.

Don't leave your web design journey up to chance. There are some times in life where it is fun to not plan ahead. For example a random day hanging out with friends or a spontaneous holiday trip to some new place. Web design though is not one of those times! If you leave your web design journey to chance-expect to fail. What this book covers is what I wish I knew when I first started web design. It is the big lessons that make a big difference. Knowing these lessons will help you avoid becoming yet another burnout who is overworked and underpaid. I will be sharing with you clear steps to get more profitable, move forward quickly, and set yourself up for a shot at real success. This book isn't just about money though-it looks at an overall smart approach to having a great business that supports a great life. This is about working smarter-not harder-to enjoy more of what life is all about. If you are ready to go then let's get started!
