- Accelerate innovation (both everyday innovation and exponential innovation)
- Pinpoint and act upon enormous untapped opportunities
- Skip problems and barriers to succeed faster

Burrus, world-renowned for his extraordinary accuracy in predicting the technological future, presents fully predictable "hard trends" and makes them accessible by using a familiar metaphor--a card game. "Entertaining and demystifying".--Stephen R. Covey (The 7 Habits of Highly Effective People). Line art.

It used to take years or even decades for disruptive innovations to dethrone dominant products and services. But now any business can be devastated virtually overnight by something better and cheaper. How can executives protect themselves and harness the power of Big Bang Disruption? Just a few years ago, drivers happily spent more than \$200 for a GPS unit. But as smartphones exploded

in popularity, free navigation apps exceeded the performance of stand-alone devices. Eighteen months after the debut of the navigation apps, leading GPS manufacturers had lost 85 percent of their market value. Consumer electronics and computer makers have long struggled in a world of exponential technology improvements and short product life spans. But until recently, hotels, taxi services, doctors, and energy companies had little to fear from the information revolution. Those days are gone forever. Software-based products are replacing physical goods. And every service provider must compete with cloud-based tools that offer customers a better way to interact. Today, start-ups with minimal experience and no capital can unravel your strategy before you even begin to grasp what's happening. Never mind the "innovator's dilemma"—this is the innovator's disaster. And it's happening in nearly every industry. Worse, Big Bang Disruptors may not even see you as competition. They don't share your approach to customer service, and they're not sizing up your product line to offer better prices. You may simply be collateral damage in their efforts to win completely different markets. The good news is that any business can master the strategy of the start-ups. Larry Downes and Paul Nunes analyze the origins, economics, and anatomy of Big Bang Disruption. They identify four key stages of the new innovation life cycle, helping you spot potential disruptors in time. And they offer twelve rules for defending your markets, launching disruptors of your own, and getting out while there's still time. Based on extensive research by the Accenture Institute for High Performance and in-depth interviews with entrepreneurs, investors, and executives from more than

thirty industries, Big Bang Disruption will arm you with strategies and insights to thrive in this brave new world.

Today we all face more impossible challenges than ever before. But flash foresight lets you transform the impossible into the possible, revealing hidden opportunities and allowing you to solve your biggest problems—before they happen. Daniel Burrus is one of the world's leading forecasters, corporate strategists, and visionaries. Over the past quarter century, he has established a reputation worldwide for his exceptional record of accurately predicting the future of technological change and its direct impact on the business world. "Wouldn't it be amazing if you could predict the future—and be right?" writes Burrus. "You can: all you have to do is leave out the parts you could be wrong about! And the amazing thing is, when you know where to look, there's more than enough you can be right about to make all the difference." From small businesses to multinationals, individual careers to entire industries, Flash Foresight looks at how Burrus's seven radical flash foresight "triggers" have transformed dozens of careers, fortunes, and lives. Both engaging and enlightening, Flash Foresight provides an easy-to-implement blueprint for applying the same strategies to your own business, enabling you to see the invisible and do the impossible. In the past, flash foresight was useful. Today, as the pace of technological change accelerates almost beyond the point of comprehension, it's an imperative.

In the bestselling tradition of *Switch* and *Made to Stick*, Ori Brafman reveals how organizations can drive growth and profits by allowing contained chaos and disruption the space to flourish, generating new ideas that trigger innovation. In *The Chaos Imperative*, organizational expert and bestselling author Ori Brafman (*Sway*, *The Starfish and the Spider*) shows how even the best and most efficient organizations, from Fortune 500 companies to today's US Army, benefit from allowing a little unstructured space and disruption into their planning and decision-making.

"Influenza pandemics are unpredictable but recurring events that can have severe consequences on societies worldwide. This revised WHO guidance publication on pandemic influenza preparedness and response acknowledges that pandemic preparedness is centered around health sectors planning but must also be broader. WHO therefore advocates a "whole-of-society" approach to sustainable and ethical pandemic preparedness while focusing in more detail on the role of the health sector. The roles of WHO and national governments are outlined to create a better understanding of how health and non-health sectors, both public and private, all contribute to pandemic preparedness"--Publisher's description.

Technological innovations are key causal agents of surprise and disruption. In the recent past, the United States military has encountered unexpected challenges in the battlefield due in part to the adversary's incorporation of technologies not traditionally associated with weaponry. Recognizing the need to broaden the scope of current technology forecasting efforts, the Office of the Director, Defense Research and Engineering (DDR&E) and the Defense Intelligence Agency (DIA) tasked the Committee for Forecasting Future Disruptive Technologies with providing guidance and insight on how to build a persistent forecasting system to predict, analyze, and reduce the impact of the most dramatically disruptive technologies. The first of two reports, this volume analyzes existing forecasting methods and processes. It then outlines the necessary characteristics of a comprehensive forecasting system that integrates data from diverse sources to identify potentially game-changing technological innovations and facilitates informed decision making by policymakers. The committee's goal was to help the reader understand current forecasting methodologies, the nature of disruptive technologies and the characteristics of a persistent forecasting system for disruptive technology. *Persistent Forecasting of Disruptive Technologies* is a useful text for the Department of Defense, Homeland Security, the Intelligence community and other defense agencies across the nation.

Providing clear, expert guidance to help engineers make a smooth transition to the management team, this a newly revised and updated edition of an Artech House bestseller belongs on every engineer's reference shelf. The author's 30-plus year perspective indicates that, while most engineers will spend the majority of their careers as managers, most are dissatisfied with the transition. Much of this frustration is the result of lack of preparation and training. This book provides a solid grounding in the critical attitudes and principles needed for success. The greatly expanded Second Edition adds critical new discussions on the development of healthy teams, meeting management, delegating, decision making, and personal branding. New managers are taught to internalize the attitudes and master the associated skills to excel in, and be satisfied with the transition to management. The book explains how to communicate more effectively and improve relationships with colleagues. Professionals learn how to use their newly acquired skills to solve immediate problems. Moreover, they are shown how to apply six fundamental principles to their on-going work with engineering teams and management. Supplemental material, such as templates, exercises, and worksheets are available at no additional cost at ArtechHouse.com.
