When Winston Niles Rumfoord flies his spaceship into a chronosynclastic infundibulum he is converted into pure energy and only materializes when his waveforms intercept Earth or some other planet. As a result, he only gets home to Newport, Rhode Island, once every fifty-nine days and then only for an hour. But at least, as a consolation, he now knows everything that has ever happened and everything that ever will be. He knows, for instance, that his wife is going to Mars to mate with Malachi Constant, the richest man in the world. He also knows that on Titan -- one of Saturn's moons -- is an alien from the planet Tralfamadore, who has been waiting 200,000 years for a spare part for his grounded spacecraft...

“[Kurt Vonnegut’s] best book . . . He dares not only ask the ultimate question about the meaning of life, but to answer it.”—Esquire
Nominated as one of America’s best-loved novels by PBS’s The Great American Read The Sirens of Titan is an outrageous romp through space, time, and morality. The richest, most depraved man on Earth, Malachi Constant, is offered a chance to take a space journey to distant worlds with a beautiful woman at his side. Of course there’s a catch to the invitation—and a prophetic vision about the purpose of human life that only Vonnegut has the courage to tell. “Reading Vonnegut is addictive!”—Commonweal

Originally published: New York: Delacorte Press, c1959.

Just another Saturday night, sometime in the middle of that decade we call the 70's, when Disco was queen and shows like Charlie's Angels and Happy Days reigned on television. But there are no angels, happy days or dancing queens for four bored friends, Kevin, Brad, Nick and Otto, who go looking for action on a sweltering Saturday night and instead get themselves involved in murder. A murder that spins them

into a twisted web of vengeful rednecks, psychotic cheerleaders, a missing flying saucer, a hybrid creature on four legs, a sadistic ghoul or two, and one lethal bad-ass babe in a leopard-skin bikini who just might give our friends more action than they'd ever dreamed of. Take a sweltering mix of swamp noir, drive-in grind house, sex and rock n' roll seventies style, and you've got what SIRENS is all about.

“Richly and often pertinently funny [with] a sure instinct for the carefully considered irrelevance . . . a great deal of incidental hilarity [and] inspired idiocy.”—The New York Times Happy Birthday Wanda June was Kurt Vonnegut’s first play, which premiered in New York in 1970 and was then adapted into a film in 1971. It is a darkly humorous and searing examination of the excesses of capitalism, patriotism, toxic masculinity, and American culture in the post-Vietnam War era. Featuring behind-the-scenes photographs from the original stage production, this play captures Vonnegut’s brilliantly distinct perspective unlike we have ever seen it before. “A great artist.”—The Cincinnati Enquirer

“Sarah Stewart Johnson interweaves her own coming-of-age story as a planetary scientist with a vivid history of the exploration of Mars in this celebration of human curiosity, passion, and perseverance.”—Alan

Lightman, author of Einstein's Dreams NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Times (UK) • Library Journal "Lovely . . . Johnson's prose swirls with lyrical wonder, as varied and multihued as the apricot deserts, butterscotch skies and blue sunsets of Mars."—Anthony Doerr, The New York Times Book Review Mars was once similar to Earth, but today there are no rivers, no lakes, no oceans. Coated in red dust, the terrain is bewilderingly empty. And yet multiple spacecraft are circling Mars, sweeping over Terra Sabaea, Syrtis Major, the dunes of Elysium, and Mare Sirenum—on the brink, perhaps, of a staggering find, one that would inspire humankind as much as any discovery in the history of modern science. In this beautifully observed, deeply personal book, Georgetown scientist Sarah Stewart Johnson tells the story of how she and other researchers have scoured Mars for signs of life, transforming the planet from a distant point of light into a world of its own. Johnson's fascination with Mars began as a child in Kentucky, turning over rocks with her father and looking at planets in the night sky. She now conducts fieldwork in some of Earth's most hostile environments, such as the Dry Valleys of Antarctica and the salt flats of Western Australia, developing methods for detecting life on other worlds. Here, with poetic precision, she interlaces her own personal journey—as a female scientist and a mother—with tales of other

seekers, from Percival Lowell, who was convinced that a utopian society existed on Mars, to Audouin Dollfus, who tried to carry out astronomical observations from a stratospheric balloon. In the process, she shows how the story of Mars is also a story about Earth: This other world has been our mirror, our foil, a telltale reflection of our own anxieties and yearnings. Empathetic and evocative, *The Sirens of Mars* offers an unlikely natural history of a place where no human has ever set foot, while providing a vivid portrait of our quest to defy our isolation in the cosmos.

Presents a selection from the fiction of Kurt Vonnegut published between 1950 and 1962, as well as two of Vonnegut's essays on his early writing.
