For the first time since the HiAce was launched in 1968 (more than half a century ago!) occupants are not sitting above the engine with their feet ahead of the front wheels. The new short-bonnet design (well, new for HiAce but well established amongst rivals) finally moves the front wheels ahead of the occupants, along

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large

contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the

development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.

don't have to be rich to travel simply, or even young for that matter – just young at heart, empathetic, and curious. The book should stimulate interest in a variety of trips in our extended neighbourhood, and in the South generally, where travelling is not only more affordable, but in countless ways more interesting. The author takes us through his adventures and brushes with history, whether the building of the Berlin Wall, wandering into Somaliland, running smack into a civil war in Cyprus, taking a front seat in the People Power revolution in the Philippines, getting arrested during the Dirty War while trying to track down a group of Sikh settlers in a remote part of Argentina, catching a

cargo boat down the Mekong from China, or riding a paddle steamer up the Nile for ten days in what is today South Sudan. By Thumb, Hoof and Wheel is entertaining, educative, and completely from a different world – a world that is rapidly changing with the forces of global homogenization. Experience a bit of it before it is lost forever.

A fascinating novel about small-town communities, which is also a love story and a whodunit. Ken McUrran runs a service station in a small town. He's an ordinary kiwi bloke who wants an ordinary kiwi life. Trouble is, a young Austrian hitch-hiker disappears. Ken's niece, Gith, has seen which car gave the young woman back-

pucker a ride. Trouble is, because of a serious car accident, Gith can't talk properly. Ken is the only person who can understand her, let alone believe her. He sets out to prove to the police - and the world - that she is right. Trouble is, the town is big on gossip and Gith and Ken have a secret of their own. An unorthodox love story and a page-turning whodunit, written with heart and intelligence, Gith puts our values and our prejudices under the microscope.
